PROFILE SUMMARY

Passionate Full-stack Web Developer with expertise in MERN seeks to contribute to innovative projects. Through independent learning and building personal projects, honed adaptability and problem-solving skills are utilised to tackle complex challenges.

SKILLS

Languages and Frameworks : C(Basics), C++(Basics), Java, JavaScript, Express.js, Typescript

Front-End Development : HTML, CSS, React.js, Tailwind CSS, Bootstrap

Back-End Development : Node.js, Express.js, MongoDB, MySQL

Familiar with : DSA, Git, GitHub, Postman, NetBeans, android studio, Visual Studio Code, AWS, Google Cloud, Firebase

PROJECTS

MANMODE

[GitHub](#)

- Developed Manmode, a responsive e-commerce clothing platform using EJS, Node.js, Express.js, and MongoDB.
- Implemented user authentication with OTP validation, email login, and password recovery.
- Integrated Razorpay for secure online payments with success/failure handling.
- Built features for product listing, sorting (by name & price), size selection, zooming, and related product suggestions.
- Developed user dashboard for managing profile, addresses, wishlist, orders, reviews, returns, and cancellations.
- Designed an admin panel for user management, product control, coupon & offer management, and order approvals.
- Ensured seamless data flow using RESTful APIs and Mongoose ODM for database interactions.

MUSIFY

[GitHub](#)

Designed and developed a Spotify-inspired web application using React for the front-end and Express.js with Node.js for the back-end.

- Developed a full-stack music player application with real-time features and a fully responsive UI.
- Built the frontend using React, TypeScript, Zustand, and Shadcn/UI for scalable state and UI management.
- Implemented role-based access with separate Admin and User panels.
- Admin: Upload, manage, and organize music tracks with metadata.
- Users: Stream music, like tracks, and interact with the application.
- Integrated real-time chat functionality using Socket.IO.
- Created secure RESTful APIs with Node.js and Express.js.
- Used MongoDB with Mongoose for efficient data modeling and storage.
- Implemented Clerk authentication for secure user login and management.
- Managed media uploads and delivery using Cloudinary.
- Designed a mobile-first, responsive UI using Tailwind CSS.
- Followed clean code practices and a modular, scalable architecture.

K-Mart

[GitHub](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Stripe, Cloudinary, JWT

- Built a full-stack MERN e-commerce application with role-based access for Admin and Users.
- Implemented secure authentication using JWT, cookies, and bcryptjs.
- Developed an Admin dashboard for product management with Cloudinary image uploads.
- Created responsive product listing, cart, and checkout flow with real-time updates.
- Designed RESTful APIs using Express.js and MongoDB (Mongoose).
- Implemented mobile-first, responsive UI using Tailwind CSS.
- Enabled secure client-server communication using Axios, CORS, and dotenv.

BLOG WEBSITE

[GitHub](#)

Created a dynamic blog application using React for the front-end and Express with Node.js for the back-end.

- Employed MongoDB as the database.
- Implemented user authentication using jsonwebtoken for enhanced security.
- Developed a component-based structure for simplified development and maintenance.
- Enabled authors to add, edit, and delete their blogs.
- Allowed users to view blogs created by others, fostering a community of content sharing.
- Ensured the application is fully responsive for a seamless experience across various devices.
- Used RESTful APIs with axios for efficient communication between the front-end and back-end.
- Utilized UUID for generating unique identifiers to ensure data integrity and reliability.

CHAT WEBSITE

[GitHub](#)

Developed a chat application using React for the front-end, Node.js for the back-end, and ChatEngine for real-time chat functionality.

- Implemented simple authentication to ensure a secure and reliable user environment.
- Designed a clean, user-friendly interface for smooth navigation and effortless use of chat features.
- Enabled both one-to-one and group chat functionality to support flexible communication and collaboration.
- Integrated ChatEngine to enable seamless real-time messaging and improve overall chat performance.
- Delivered a versatile communication platform supporting personal conversations as well as group discussions

MINI PROJECTS

PORTFOLIO WEBSITE

[GitHub](#)

Developed a personal portfolio website showcasing skills, projects, and resume.Created web application using React and hosted it as well.

WEATHER WEBSITE

[GitHub](#)

- Real-time updates: Fetches and displays current weather conditions instantly, either based on user-specified location input.
- Location-based forecasts: Delivers detailed weather forecasts for specific locations, covering essential parameters like temperature, humidity, wind speed.

EXPERIENCE

INTERNSHIP

Brototype pursuing

INTERNSHIP

Synnefo Solutions  2024 - 2024  Kochi

One of my achievements that closely matches the job I'm applying for is completing an internship as a MERN (MongoDB, React.js, Express.js, Node.js) stack developer. During this internship, I gained hands-on experience and proficiency in key technologies relevant to the position,allowing me to contribute effectively to projects and meet job requirements.

GRAPHIC DESIGNER

Freelancer

- Produced engaging social media posters and banners for diverse clients, ensuring alignment with their branding and promotional goals.
- Designed and developed a dynamic website for a client. [Demo](#)
